**Subject Area: Science**

Grade 4	Brief Summary of Unit: Geology is the study of our planet's earth materials and natural resources. The Soils and Landforms Module provides students with firsthand experiences with soils, rocks, and minerals, and modeling experiences to study changes to rocks and landforms at Earth's surface. ( <i>Core Ideas - ESS2: Earth's Systems and Earth and Human Activity</i> )
<b>Earth Science- Soils, Rocks, and</b>

Provide translated/visual cards with terms such as weathering, erosion, chemical weathering, etc.  Word Wall  Provide visuals and pictures for science terms.  Provide students with picture to help visualize concepts.  Use gestures for simple word problems</p>

Modeling activities in a small group  
FOSS ELA connections

**Modifications for Gifted students:**

Complete a stream table lab to further expand on the concepts of weathering and erosion  
Online activities

**Subject Area: Introduction**

Fourth Grade	<p><b>Brief Summary of Unit:</b> Students will be introduced to the structure of fourth grade science. They will learn strategies and begin to use tools necessary for success in Science. Through the introduction of the science and hands-on experiments the students will use techniques to see details about the world that would otherwise be difficult to observe.</p>

<b>Objective</b>	<b>Standards</b>	<b>Skills – SWBAT</b>	<b>Suggested Activities</b>	<b>Suggested Assessments</b>	<b>Pa</b>
<p>ve has a pattern with wavelength, and (MS-PS4-1)</p> <p>ve needs a through which ted. (MS-</p> <p>hines on is sorbed, or through depending t's the color) of the (4-2)</p> <p>t light e traced as , except at ween nsparent g., air and d glass) ht path (PS4-2)</p>	<p><b>MS-PS4-1</b></p> <p><b>MS-PS4-2</b></p> <p><b>MS-PS4-3</b></p>	<p><b>Use mathematical representations to describe a simple model for waves that includes how the amplitude of a wave is related to the energy in a wave. (MS-PS4-1) (Science and Engineering Practices)</b></p> <p><b>Develop and use a model to describe that waves are reflected, absorbed, or transmitted through various materials. (MS-PS4-2) (Crosscutting Concepts)</b></p> <p><b>Explain why we can see the color of an object in space but cannot hear sound. (MS-PS4-2)</b></p> <p><b>Use ray diagrams to explain how refracted light and reflected light bring images of distant objects closer and enlarge things that are too small to be observed with an unaided eye. (MS-PS4-2)</b></p> <p><b>Integrate qualitative scientific and technical information to support the claim that digitized signals are a more reliable way to encode and transmit information than analog signals. (MS-PS4-3) (Crosscutting Concepts) (Science and Engineering Practices)</b></p>	<ul style="list-style-type: none"> <li>- Predict the path of reflected or refracted light using reflecting and refracting telescopes as examples. (Critical Thinking).</li> <li>- Investigate many properties of light through learning centers: Diffraction Action, Did You See the Light?, CD Rainbows, Spinning Colors, Bending Light, and Between Light and Heat.</li> <li>- Apply knowledge about thermodynamics to design a structure that prevents heat movement and protects a spacecraft. (Critical Thinking, Creativity &amp; Innovation).</li> <li>- Interact with online simulations such as "Gizmo's Heat Transfer" and Conduction. Examine the transfer of heat energy through a material and explore how the temperature difference affects the rate of heat transfer.</li> <li>- Collect real-time observations and data to relate conduction,</li> </ul>	<p align="center"><b>FORMATIVE</b></p> <hr/> <p>Teacher observations</p> <hr/> <p>Diagnostic/Constructive quizzes and tests: taken online for instant score feedback</p> <hr/> <p>NJSLS Resources: Classroom Application Assessments</p> <hr/> <p>Learning/Response Logs: Daily Do-Now Assignments</p> <hr/> <p>Anecdotal Records</p> <hr/> <p>Completed Labs and Projects</p> <hr/> <p>Student Responses</p>	<p>3-4</p> <p>(su</p> <p>Se</p> <p>De</p>

<p>Model of light explaining color, and frequency-dependent of face media. (MS-PS4-3)</p> <p>Cause light through not be a wave, like other waves.</p> <p>Signals (sent) are a way to transmit (MS-PS4-3)</p>		<p>Create a simple model that explains the mechanism for how wave pulses are used to save, transmit, and receive information. (MS-PS4-3)</p>	<p>convection and radiation phenomena to the evolution of a hurricane. Share and discuss with the rest of class. (Measurement &amp; Data)</p> <p>- Create a multimedia presentation (Life and Career Skills), based on the model and the principles of conduction, convection and radiation.</p>	<p>Science Portfolios (when relevant)</p> <hr/> <p>Science Binder/Journal</p> <hr/> <p style="text-align: center;"><b>SUMMATIVE</b></p> <hr/> <p>End of Unit test (benchmark)</p> <hr/> <p>Science Portfolios (when relevant)</p> <hr/> <p>Performance Assessments on the activities described (alternative assessments)</p> <hr/>

**Components**

Themes	<input type="checkbox"/> Global Awareness <input type="checkbox"/> Financial, Economic, Business, and Entrepreneurial Literacy <input type="checkbox"/> Civic Literacy <input type="checkbox"/> Health literacy
Skills	<input type="checkbox"/> Creativity and Innovation <input checked="" type="checkbox"/> Critical Thinking and Problem Solving <input type="checkbox"/> Communication and Collaboration <input type="checkbox"/> Information Literacy <input type="checkbox"/> Media Literacy <input checked="" type="checkbox"/> Life and Career Skills
Curricular Connections	Measurement & Data: 6.NS.3, 6.EE.9, 6.SP.1-3, 6.SP.4-5
Use of Technology	Computers, Use of online resources to gather and interpret data, use of online simulations. Multimedia projects. <i>Modeling and Simulation Technology</i> .
	<p>For Teachers: Supplies for activities/labs, FOSS manuals, BrainPop materials, PowerPoint presentations</p> <p>For Students: FOSS kits, laptops, models/templates, BrainPop materials (print and online), Google Classroom assignments, online simulations.</p>

Accommodations	<p>Modifications for Special Education/504/At-Risk students: Provide additional multimedia resources for reflection and refractive concepts, provide opportunities for simpler version of Energy Basics simulation, level appropriate multimedia (e.g. shorter articles or different article on same topic), additional explanatory handouts for modelling and refractive vocabulary reference sheets, partnering with student helpers, Comply with all IEP modifications and 504 plans, modified/simplified lab report templates and assistance extra assistance with lab stations.</p> <p>Modifications for EL students: Use of electronic translation (laptops), partnering with native speakers, providing visual/translated cards with waves and electromagnetic terms.</p> <p>Modifications for Gifted students: Additional articles/material on each topic, handout including links for additional and online programs, assignment to be student helpers, project comparing digital and analogue signals for music production and/or video.</p>
